

Gulf CHMA Update – October 2013, Cycle 38

Phil Stansly and Pilar Vanaclocha.

As of the **38th cycle**, the total number of MB surveyed increased from 5,501 to 5,507 but with 1,665 of these having n/a (i.e. not available – 30% total not surveyed). In the 5 County area, the number of multi-blocks surveyed decreased from 820 to 815 but with 320 MB had n/a for their data (39% not surveyed). For comparison, total MBs surveyed in the other CHMAs combined totaled 4,692 MB with 1,345 n/a for 29% not surveyed. The 38th cycle of the statewide survey was completed on 4 October 2013. Collier and Lee counties had ACP increases. Charlotte, Glades and Hendry counties had decreases in ACP counts. The map now shows only **Cycles 32 – 38** to better fit the data (Fig. 1). The number of **hotspots** has decreased from **6** to **3** (Fig. 1. and 2.) (i.e. Multi-block ID with ≥ 21 psyllids) for Cycles 36, 37 and 38 (see interactive map on our website for locations of psyllid counts and hotspots).
