

Gulf CHMA Update – Apr 2012, Cycle 12

Phil Stansly and Moneen Jones

As of the 12th cycle, the total number of MB surveyed has increased from 6,003 to 6,026 with 879 in the 5 county area. The 12th cycle of the statewide survey was completed 6 Apr 2012. Hendry and Charlotte counties appear to be leveling off in their psyllid counts, whereas Glades’ counts have almost doubled since the last cycle (Fig. 1). The good news is that still only 1 hotspot (i.e. Multi-block ID with ≥ 21 psyllids) for Cycles 10, 11, and 12 remains (see interactive map for location).
