

# Gulf CHMA Update – Mar 2012

Phil Stansly and Moneen Jones

As of the tenth cycle, the total number of MB surveyed has increased from 5,944 to 5978 with 869 in the 5 county area. The ninth cycle of the statewide survey was completed 24 Feb 2012. All counties have had a decrease in average psyllid counts since Cycle 9 (Fig. 1), and only 1 hotspot (i.e. Multi-block ID with  $\geq 21$  psyllids) for Cycle 8, 9, and 10 remain (see interactive map for location).
