

Gulf CHMA Update – Sept 2012, Cycle 20

Phil Stansly and Moneen Jones

As of the 19th cycle, the total number of MB surveyed has increased from 4,969 to 5,178 with 776 of these having n/a (i.e. not available – 15% not surveyed). In the 5 County area, the number of multi-blocks surveyed increased from 822 to 829, and 256 MB had n/a for their data (30% not surveyed). The 20th cycle of the statewide survey was completed on 21 September 2012. Collier and Lee County ACP counts are increasing. The map now shows only Cycles 11 – 20 to better fit the data (Fig. 1). There are now **10** hotspots (i.e. Multi-block ID with ≥ 21 psyllids) for Cycles 18, 19, and 20 (see interactive map for locations).
