

As part of our effort to improve communication among individuals around the world who are interested in Citrus greening (HLB), Asian citrus psyllid, and topics surrounding current issues in the citrus industry worldwide, the Southwest Florida Research and Education Center (SWREC) at the University of Florida has created a LISTSERV managed email network. The LISTSERV takes advantage of Internet technology to facilitate communication worldwide. Anyone who has access to an email address can subscribe to it free of charge. However, if you do not have an internet connection, there may be a telecommunication charge.

Once you have subscribed, you can post messages/information to the email system that will electronically and almost instantly send your message/information to all other subscribers. The LISTSERV is a forum for ideas and a vehicle for discussion of research, ideas, or problems. The success of the LISTSERV depends on you, its users to create dynamic and relevant conversations.

1. To subscribe from an e-mail address:

Send a message to LISTSERV@lists.ufl.edu
with the one-line message:

SUBSCRIBE hlb_database-L (your first name) (your last name)

2. To post information to all subscribers on the list,
send an email message to hlb_database-L@lists.ufl.edu

Because submissions to the LISTSERV are restricted to subscribers only, all submissions by subscribers must be made from the email address from which they subscribed

3. To get general information on LISTSERV commands, send an email message to LISTSERV@lists.ufl.edu with the one-line message

GET LISTSERV REFCARD

REMINDER:

LISTSERV@lists.ufl.edu address IS USED ONLY TO SEND COMMANDS (for example SUBSCRIBE)

hlb_database-L@lists.ufl.edu address IS USED TO SEND MESSAGES for distribution to all subscribers
